

BIO 2025

Manifesting superhuman force through near-magic sonic alchemy, Ho99o9 consistently break free from any and all creative constraints. The duo—theOGM and Yeti Bones—co-mingle genres like chemicals, mixing gloriously hellish hip-hop, basement-born hardcore, future-facing punk, throat-slitting metal, jarring industrial, and off-kilter electronica into a concoction meant to combust the moment you press play or when they hit the stage. As such, the group has quietly haunted the darkest corners of the culture, peeking out with a series of unanimously acclaimed releases, A-list collaborations, and sold-out tours. In 2025, they make a statement with their third full-length album, *Tomorrow We Escape*.
